

HYDROFLUX

WATER | SCIENCE | TECHNOLOGY

INTRODUCTION

o 2010

Founded in 2010, Hydroflux specialises in distributing the latest technology water purifiers.

From just distributing undersink water filtration system then, Hydroflux now provides both tank and tankless hot and cold water purifier for homes and offices, adding convenience and enhancing healthy drinking water to households in Singapore.

From product offering, servicing and installation, Hydroflux is a whole company that offers full service, even providing in house warranty.

Having being in the market for seven years, Hydroflux today is one of Singapore's leading household brand for water purification system. Our main goal is to eventually generate awareness among Singaporeans the benefits of drinking purified water.

o Present

CLEAN CARE SERVICE

Hydroflux's service will visit customers for clean care service. Product maintenance for safe and healthy product use.

Servicing

Installation

Nozzle Cleaning

Filter Change

**CONVENIENT WATER-EXTRACTION SYSTEM
FOR ADJUSTING QUANTITY OF WATER**

You can choose the amount
of water as needed.
(120ml/550ml/1500ml)

ECON SAVING MODE

The 1st grade of energy
efficiency rating system.

STYLISH BODY

The space use of slim design
that delights your eyes.

H 2300 Model

- Size: 50cm(D) x 41cm(H) x 18cm(W)
- 5 Temperatures:
 - Ice Cold water (4 °C)
 - Normal Room Temperature Water (27 °C)
 - Hot Water (40°C, 60°C, 87°C)
- Eco mode
- Quantity control (120ml/550ml/1500ml)
- Safety lock button
- UV LED

- Rose Gold
- Silver
- Gold

This 3 in 1 **Micro Antioxidants Carbon Filter** reduces sediment particles such as dirt and sand down to nominal 5 micron in size from feed water, and absorbs some of the harmful organic chemicals such as chlorine, bad taste and odor.

This **NanoFact Filter** removes water contaminants such as waterborne micro-organisms and bacteria, virus by Cellulose Nano fiber.

Filters

SEDIMENT FILTER

This sediment filter reduces sediment particles such as dirt and sand down to nominal micron in size from feed water and protects membrane and pre-carbon filter.

PRE CARBON FILTER

This pre-carbon filter absorbs some of harmful Organic chemicals such as chlorine, bad taste and odor. The raw material of this filter is coconut based and acid-rinsed.

NANOFACT FILTER

This NanoFact Filter removes water contaminants such as water borne micro-organisms and bacteria, virus by Cellulose Nano fiber.

ALKALINE FILTER

This Alkaline filter absorbs some of harmful organic chemicals such as chlorine, bad taste and odor from feed water.

This filter can reduce particles over 5.µm. This filter contains Mg fine particles and this element, water passed this filter can be changed into mild alkaline water.

MICRO CARBON FILTER

This Micro Carbon Filter reduces sediment particles such as dirt and sand down to nominal 5 micron in size from feed water, and absorbs some of the harmful organic chemicals such as chlorine, bad taste and odor.

MICRO CARBON FILTER

This Micro carbon filter reduces sediment particles such as dirt and sand down to nominal 5 micron in size from feed water, and absorbs some of harmful organic chemicals such as chlorine, bad taste and odor.

MICRO ANTIOXIDANTS CARBON FILTER

This 3 in 1 Micro Antioxidants Carbon Filter reduces sediment particles such as dirt and sand down to nominal 5 micron in size from feed water, and absorbs some of the harmful organic chemicals such as chlorine, bad taste and odor.

NANOFACT FILTER

This NanoFact Filter removes water contaminants such as water borne micro-organisms and bacteria, virus by Cellulose Nano fiber.
